

# Contact Form 7 Storage plugin for WordPress

**Contact Form 7 Storage plugin stores copies of all Contact Form 7 submissions (including attachments) in your WordPress dashboard.** All form entries and leads will be stored safely even if your e-mail goes down or e-mail messages go missing or get deleted.

This plugin is developed and maintained by Kaspars Dambis who is a WordPress core contributor and professional WordPress consultant since 2007.

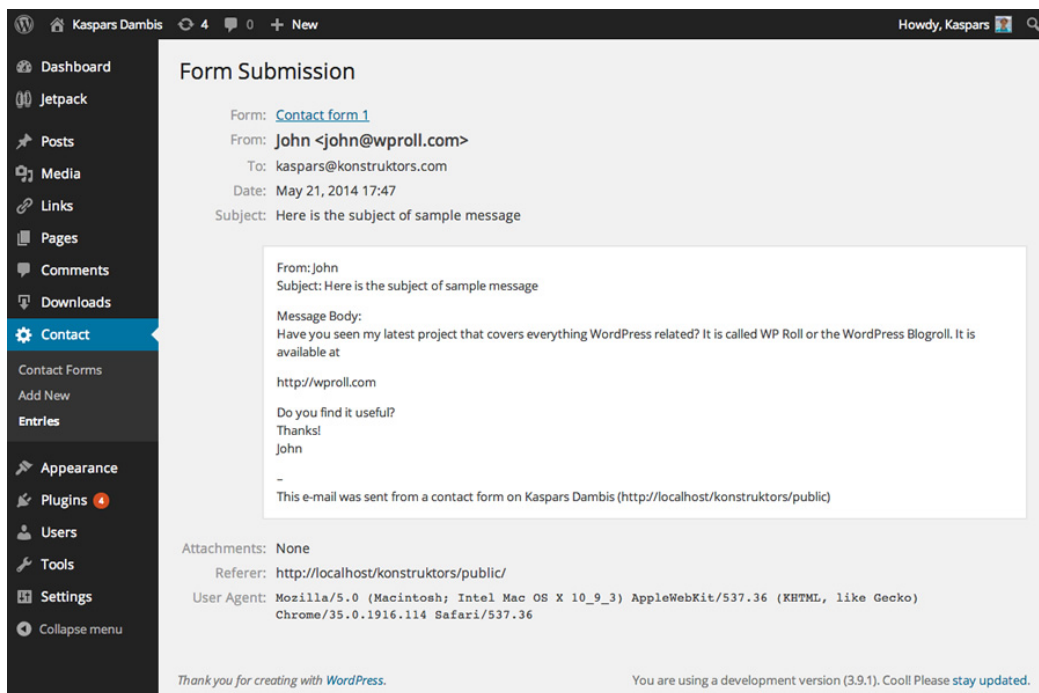

## Features

**All form submissions are stored in the WordPress backend in addition to being sent via e-mail.** E-mail delivery is never 100% reliable and having a backup of all contact entries will ensure you never miss a lead or inquiry.

**Each entry also stores the following details about the submission:**

- Time and date of the entry
- E-mail of the contact form recipient
- Subject line of the e-mail that was sent to the contact form recipient
- All attachments uploaded to the contact form
- Page URL of where the contact form was submitted (referrer).
- Browser and device information of the submission.
- Link to the setup page of the contact form that was used for submission.

## Installation

1. Select *"Plugins > Add New"* from the main menu in your WordPress dashboard.
2. Select the *"Upload"* tab at the top of the page.
3. Select the *cf7-storage.zip* file for the upload and click *"Upload"*.
4. Be sure to activate the plugin once it has been uploaded.

## Usage

**This plugin adds a new section called "Entries" under the "Contact"**

**menu** in the WordPress dashboard which lists all of the contact form submissions in a reverse chronological order.

**Dropdown selectors at the top of the list provide filtering and sorting of the contact form entries** by the contact form used for submission and the date of submission.

**Free form text search is also available** for finding a specific entry.

## Requirements

---

- Requires at least: WordPress 3.2
- Tested up to: WordPress 3.9.1

## Screenshots

---

1. List of all form submissions.
2. Detailed view of each submission.

## Changelog
